The purpose of this course is to teach the fundamental laws of mechanics and introduce students to the basic applications of these laws.

Course Lecturer: Prof. Dr. Göktuğ KARPAT
Section: 3

This course will introduce the basic elements of structural programming. Java programming language will be used in code applications. Topics include the concept of type, main types, expressions, standard functions, input/output statements, control structures, selection statements, repetition statements, functions, modularity in programming, global and local variables, dynamic variables, and

This course seeks to place on solid foundations the most common structures of computer science, to illustrate proof techniques, to provide the background for an introductory course in computational theory, and to introduce basic concepts of probability theory.

Course Lecturer: Dr. Öğr. Üyesi Okan Yaman

COMMENTS

Your Comment:

WAITING FOR ADMINISTRATOR APPROVAL...

KingAhmet-ENG210:
It's a very easy lesson. Generally everyone passes AA. All you have to do is submit your assignments on time.

KorayVefa2004-MATH240:
I had a hard time with the math subject, which was my worst in mathematics, probability, but overall my friends passed this course with high grades.

AliBey-SE226:
It is a very easy course. I passed it easily by studying weekly. If you have understood the coding lessons well before, it is a perfect course to improve your grades.

Koray Yereli (Student):

If you understood the topic in the last lesson of Math240, do you have a chance to explain it to me?

Efe Yolartıran (Student):

We had to wear formal clothes while giving our presentation in the English project. Don't forget your shirt when you come to the presentation tomorrow!

Ayten Alpman (Advisor):

You couldn't pass the Italian course you took last term. I recommend you to switch to another foreign language next semester.

Hi Onur E
Quick adv
Project Ti   it's key.
Know You   ll to avoid
redoing w
Go Step b   fine as
you go.
Use Reso   and office
hours.
Manage Time Effectively: Balance project work with other studies for
success.
Hope this helps, Onur!

Why was my course comment not verified?

Comment verifications are carried out by administrators. Comments are usually verified within 24 hours, but this may take longer depending on the intensity. Another possibility is that your comment may have content that is objectionable to the general rules.

App does not make accurate lesson suggestions

Our course recommendation system is designed to recommend the most suitable courses to users using artificial intelligence and machine learning technologies. However, like any AI system, this system is still under development and is constantly learning. Therefore, it may not always provide perfect results.

Will there be a language option in the app?

Currently, we only have English language option, but we plan to increase the language options in the future.

If the answers above did not help you, please let us know your problem by pressing the button on the side.

Frequently Asked Questions

LUPA

I am having problems logging in to the LUPA App

If you are having trouble logging in to the application, first make sure you are registered. Then you can follow these steps: Close and reopen the application, Check your internet connection, Make sure the application is up to date, Clear the cache of the application, Clear data, Restart the device.

I can't get a verification code in my mailbox

Please be sure to check your school e-mail. It may take up to 5 minutes for the verification code to arrive in your mailbox. If not, please follow the same procedure again.

The application does not accept my university ID

Your university ID and university mails are defined by the IT department of your university. Therefore, first contact your university and ask them to solve the problem. If the problem is not solved, you can contact us.

If the answers above did not help you, please let us know your problem by pressing the button on the side.
